Subject: Stop this NOW!

To whom this really concerns,

Our Nation, is up in arms because of the events of 9/11/01 as well as we still worry about future events! We try to rise above all this by Uniting as ONE!

More Lawsuits, NOW, of all the times again against a Company that has done nothing really wrong! Except make the technology era of the world a lot of money in the past!

Now when the stock market needs a lift and needs a company like Microsoft to help lead the way again! There have been many people hurt deeply as they were coming close to retirement age! They didn't want to worry about an SSI check and living from month to month! All they did was try to do the best they could for themselves and their families! Instead now their Mutual Funds have all but dried up they have nothing left to their once well balanced 401k and they don't have another 25 years to make their losses up!

Sounds a bit sad as well as familiar!

AOL at this point has no good sense but to add more pain to all Americans who have worked hard all their life! This is a shame! And it shows in their stock price for which I am a shareholder!

Let Microsoft's case be settled and STOP the MADNESS and let the one company just go on to innovate and lead the way for others to do the same! AOL Time Warner is all sour grapes about that their fun in the sun was coming to an end and now they don't want the party to stop! Now tell me "Who is really a Monopoly at this time" ?? It spells AOL that is who!

Our nation, needs to recover more and more people have been losing their jobs! Is this what AOL wants more of. Perhaps Mr. Greenspan didn't want the middle class to get rich but at this point he's made it so the rich can't get any richer as a matter of fact some of them are getting poorer! Where's it going to end, If you have any say in this matter Please I beg you to do the right thing and make it so Microsoft can settle their case and be left alone until they really and truly were to do something criminal but until then we as a nation are losing out on being able to help ourselves to keep our own economy stable.

Thank You
Terrence Lipinski
